Research interests

I am a Lecturer in Infectious Disease at King's College London and a Fellow of the Higher Education Academy (FHEA). My research focuses on host-pathogen interactions, genomic epidemiology, and antimicrobial resistance for globally relevant bacterial pathogens. In my lab, we use the zebrafish model to recapitulate human infections with a variety of bacteria, including *Shigella*, *E. coli*, *Salmonella*, and *Mycobacterium*. We are also interested in cell biology and we explore infections as a tool to obtain a better understanding of cell functions in both physiological and pathological contexts. Over the last few years, my work focused on the persistent carriage of enteropathogens and on the development of innovative strategies to counteract *Shigella* infections.

I was previously a Senior Lecturer in Microbiology and Co-Course Leader for BSc (Hons) Medical Sciences at the University of Westminster, an Assistant Professor and Wellcome ISSF Fellow at the London School of Hygiene and Tropical Medicine, a Marie Curie Research Fellow at Imperial College London and a Marie Curie PhD Fellow at Leiden University.

I was awarded a Postgraduate Certificate in Learning and Teaching (LSHTM), a PhD in Microbiology and Immunology (Leiden University), a MSc in Molecular and Cellular Biology (Salerno University) and a BSc in Molecular and Computational Biology (Salerno University).

Qualifications

Education, Postgraduate Certificate, PGCELT, London School of Hygiene & Tropical Medicine
Award Date: 4 Jul 2022

Microbiology and Immunology, Doctor of Philosophy, PhD, Leiden University
12 Jan 2012 → 30 Jun 2016
Award Date: 17 Nov 2016

Biology, Master of Science, MSc, Università di Salerno
Award Date: 26 Oct 2011

Molecular and Computational Biology, Bachelor of Science, BSc, Università di Salerno
Award Date: 10 Dec 2009

1 Jan 2022 → ... Fellow of the Higher Education Academy, FHEA
10 Oct 2019 → ... Home Office Personal Licence, PiL A/B, E1/L
24 Jun 2014 → ... Laboratory Animal Science Level C, FELASA C
